ABOUT US

Wuping Feitian Electronics Technology Co., Ltd. is a national high-tech enterprise specializing in printed circuit boards (PCBs), with a registered capital of 30 million RMB. The company owns three factory buildings with a production area of 15,000 square meters, located at No. 4, 5, and 6 Xingfu 2nd Road, Yanqian Industrial Park, Wuping High-tech Zone, Fujian Province. The factory is bordered by Shanghang County, Fujian Province to the east, Jiangxi Province to the west, Guangdong Province to the south, and Changting County, Fujian Province to the north. It is a crucial transportation hub and distribution center for goods in western Fujian, eastern Guangdong, and southern Jiangxi, known as the "Golden Triangle" of western Fujian. The company boasts a complete supply chain, with daily logistics and express delivery services to and from all over the country, ensuring convenient transportation and rapid service. It has a stable management team and over 300 skilled technical employees, equipped with advanced production and testing equipment in the PCB industry. Furthermore, it has established and obtained certifications for modern enterprise management systems, including National Military Standard, ISO9000, ISO/T/S16949, UL, CQC, ISO14001, and CQCThe company's printed circuit boards are mainly sold to large domestic electronics enterprises in the Pearl River Delta and Yangtze River Delta regions, as well as to Europe, America, Japan, South Korea, and Southeast Asia. The company's monthly production area reaches 100000 square meters, with up to 1,200 different models produced monthly.With increasingly fierce market competition, Feitian Company has placed stricter standards on quality, efficiency, and cost, fully leveraging its advantages in market, technology, and talent to strive to provide customers with the highest quality and fastest products and services.

20L with 3X Lam/Drill/Plate

- **FR408HR**
- 4.9" x 13.3" (125x337mm)
- Thickness .094" (2.4mm)
- Construction 8+4+8
- Aspect Ratio 12:1
- Blind vias L1-8, L13-20
- Micro vias L1-2, L19-20
- Minimum L/S .003" (.08mm)
- Min. Drill/Pad .004"/.012" (.10/.30mm)
- 32 sets of impedances (SE/Diff)
- ENIG + Hard Gold

Our Advantages

1. Mature technology for manufacturing thick copper plates for industrial control and power supplies
2. Advanced technology and equipment in the industry
3. Possessing cutting-edge 5G product technology
4. Orders accepted both online and offline
5. Multi-variety (3000 part numbers/month), small to medium batch, short lead time support; unlimited batch size (1 piece to 5000 square meters).

We're always on the road.

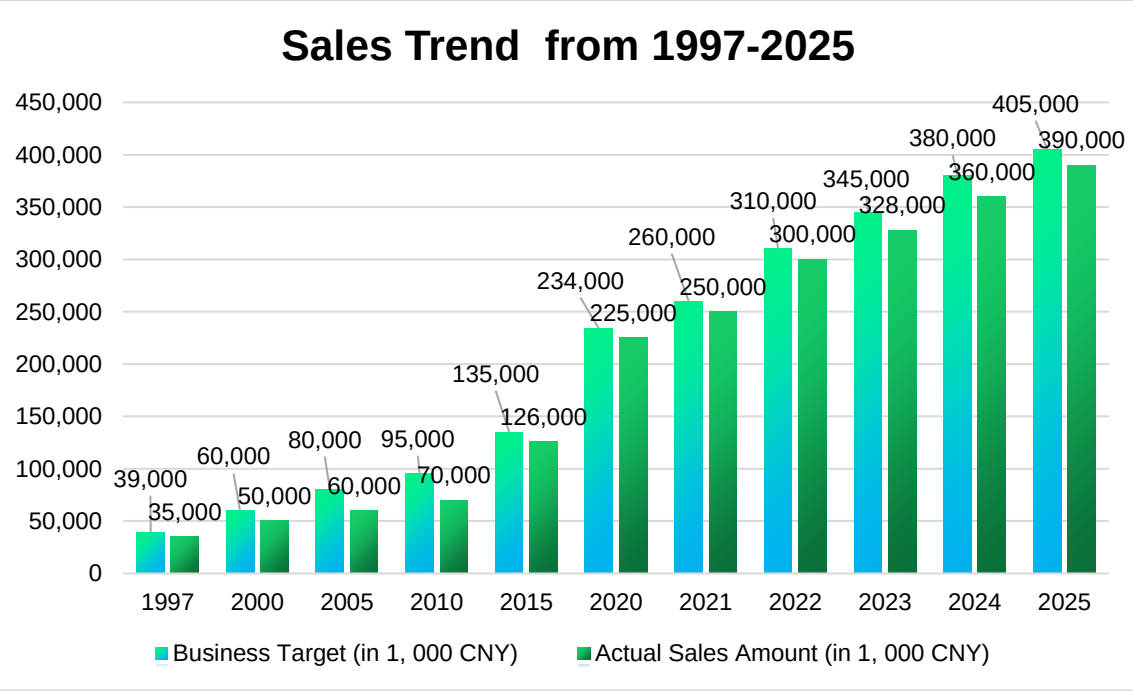

- Improve our proprietary intellectual property management software system (Yunshang Feitian)
- Improve the Yunshang Chuyang online order-taking system (e-commerce system)
- Creatively construct a micro-control management model; utilize big data and mathematical models to innovate and evolve traditional management models
- Implement a horizontal line model with delivery time as the target; control system software-based and simulation-based production management.

Operating Performance

The correct direction and decisions made by company's leaders, along with the joint efforts and contributions of every Feitian employee, are the driving forces that propel Feitian forward steadily and continuously.

Company Team

Team Introduction

Our team

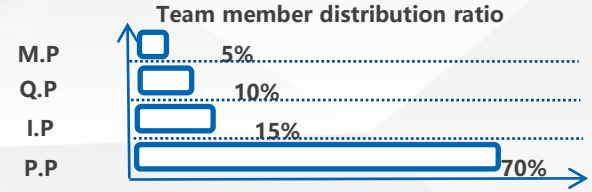

A team is a system of coordinated actions or forces among a small group of people with different abilities and a shared goal. Like the five senses of a person, these individuals work together to maintain survival; none can be missing.We are a professional team. Our members have many years of professional technical background in the PCB industry.We are a young team. Our average age is 29 years old, full of vigor and innovation.We are a focused team.

We firmly believe that a brand originates from customer trust. Only through focus can a company succeed. We are a team with a dream. We come from all over the country, united by a common dream: **to build a truly excellent PCB company and provide customers with the most reliable PCB products**.

Company members

Chen Jingqiu

Company shareholder and manager. Professor at Shenzhen University, PhD from Huazhong University of Science and Technology. A key technical supporter of Feitian. He led the company's technical team to provide strong professional technical support for Feitian, and created the Feitian ERP system and the Feitian cloud-based software.

He Liangying

With 20 years of experience in the PCB industry, including 16 years in senior management positions in American, Hong Kong, and private enterprises. As director and supervisor at Feitian, and the founder of Feitian, responsible for Feitian's market operations.

Team/Technical Advantages

The company was founded by a professor from Shenzhen University. Chairman Chen Jingqiu is a professor and Doctor of Engineering at Shenzhen University. Leveraging the resources of Shenzhen University, he has long been engaged in forward-looking research on the development of the PCB industry, conducting systematic research on key areas of the PCB sector. This allows the technical team to stay abreast of the latest cutting-edge technologies in the PCB industry. The company already possesses numerous independent 5G invention patents, making it the company with the most authorized 5G-related invention patents in Longyan City, and the only company with the capability to R&D and produce 5G high-frequency boards.

Industry Honors

Feitian Electronics is a designated enterprise-university cooperation partner of Shenzhen University, with a professional postgraduate team serving as its technical support. Mr. Chen Jingqiu, Chairman of Feitian Electronics, is a professor at Shenzhen University and holds a doctorate in engineering. Professor Chen leads a professional postgraduate team focused on PCB chemistry and cutting-edge PCB technology research and application.
